Letter from the Directors

The Igarape Institute leaned-in throughout 2021 whether to support the distribution of Covid-19 vaccines and protective equipment in the Amazon, accelerate action with the UN Secretary General and the Common Agenda or expanding civic space both on and offline. On the anniversary of our tenth year of operation, the Igarapé Institute team is steeling itself for a volatile and uncertain decade ahead. The Institute is doubling down to address the most important existential challenges of our generation - climate, digital and physical security.

The Igarapé Institute does not shy away from the most intractable problems of our time. In Brazil, the Institute has worked to fight back against government efforts to loosen access to firearms and ammunition, strengthen the professionalism of police, and help former prisoners reintegrate into society. In addition to creating platforms to amplify the voice of female leaders, Igarapé is investigating and exposing harassment and intimidation of environmental activists in the Amazon. Afterall, all attacks on democratic action is an attack against all of us.

The Institute is also working hard on big intractable global issues. Throughout 2021, the Institute led high-level consultations on climate security with members of the UN Security Council. What is more, the Institute supported a global digital consultation reaching thousands of people in over 100 countries to identify concrete proposals to improve multilateral action and international cooperation. The Institute also allied with digital rights coalitions to champion the rights of digital privacy and data protection, bringing these conversations back to Latin America to engage audiences young and old.

At the center of Igarapé Institute’s approach is a dedication to evidence and data-based solutions. The Institute is leveraging its research and expertise in geospatial and social sciences to address climate and environmental challenges, including in the Amazon and the people who inhabit it. Developing sustainable solutions to deforestation and biodiversity loss is critical. Identifying meaningful economic alternatives for people living in the world’s largest tropical forests is essential. It is not just the future of Brazil, but the world, that hangs in the balance.

There is no doubt that 2021 was a challenging year. Autocratic governments are on the march, fueled by irresponsible leaders, economic uncertainty and polarization. Democracies are facing challenges, with faith in electoral systems at worrying low levels. War clouds have gathered over many parts of the world, not least in Russia and Ukraine, that threaten to push the globe into a recession. The Igarape Institute is committed to addressing these interconnected challenges, through timely and reliable research, strategic partnerships and targeted public outreach. To this end, the Institute produced a record-breaking 52 reports, participated in 130 events, generated almost 1,000 opinion editorials and was cited over 4,150 times in the media.
The Igarape Institute is approaching 2022 with a renewed commitment in its original vision, mission and values. True to its name - Igarape - a Tupi word that translates into the channels that connect rivers in the Amazon - the Institute is building networks and coalitions to take on the toughest challenges and deliver action to improve security for the climate, digital space and in the real world. We invite you to join us in our mission to build a safer and more sustainable world for this generation and the ones to come.
2021
Activities
Shaping the next decade

The Igarapé Institute celebrated its first decade by redoubling its commitment to finding solutions for a more sustainable, inclusive, and safer world. The evolution of the Covid-19 pandemic and the uneven advance of vaccination, benefitting disproportionately the richest countries, reinforced our conviction to fight for more public, climate and digital security for everyone.

Over the past decade the Igarapé Institute team has visited more than 150 countries, published more than 300 studies and 2,000 opinion pieces in newspapers and magazines. Over the Igarapé decade, the institute has been cited in more than 37,000 stories and has developed 28 technological apps and platforms.

The Igarape Institute honed in on issues of policing and criminal justice in Brazil in 2021. Igarapé supported the creation of a Parliamentary Front for Armes and Ammunition Control and shaped debate on Bill 3,729/2019, a bill designed to weaken arms legislation. In the Judiciary, the Institute served as amicus curiae in proceedings filed with the Federal Supreme Court and provided Court Ministers crucial information on the threats posed by the regulations that loosen the rules for access to arms and ammunition. The Institute also worked with partners to document the expansion of armed groups and lax weapons control in the country. The Institute maintained a lively presence on social media, including the Não Somos Alvo [We Are Not Targets] campaign.
The Igarape Institute also worked to reform law enforcement and promote conflict mediation with police officers. In addition to publishing extensively on the challenges of excessive police use of force and the dangers of mano dura policies in Latin America, Institute staff continued to advocate for changes in the national drug policy and strengthening networks for support to former prisoners. The Institute published a major study on more progressive drug-related legislation, highlighting less punitive metrics to measure outcomes.

The Igarape Institute also engaged in the Climate Conference (COP26), including highlighting the connections between organized crime and deforestation, land grabbing, wildcat mining and wildlife trafficking. The Institute released a range of stories and data on its EcoCrime platform and published several studies on the wide-ranging impacts of environmental crime in the Amazon – especially illegal mining – and potential solutions.

The Institute also produced guidelines to accelerate sustainable agricultural assets and the greening up the supply chain in the Amazon Basin. The Igarapé Institute called forcefully for the protection of native peoples and traditional communities through a wide range of media and policy outlets. And as part of its ongoing partnership with UN Security Council members, the Institute analyzed how climate change is exacerbating social tensions and armed conflicts in Africa’s most vulnerable countries, including the Horn.

The Institute responded to the rise of autocratic and anti-democratic threats with innovative studies and a landmark analysis of attacks and threats to civic space. A goal was to create a “commons” where civil society can debate and shape the national agenda. The Institute launched a call for civil society engagement alongside dozens of organizations and influencers. The Institute’s president and co-founder interviewed ten female scientists, artists, entrepreneurs, and influencers in the latest season of the widely acclaimed Você Pode Mudar o Mundo [You Can Change the World] podcast.
In partnership with the UN Secretary-General’s Executive Office and UN Foundation, the Igarapé Institute administered a digital consultation reaching participants in 147 countries. The goal was to collect insights from a wide range of civil society actors - mayors, business people, activists, academics, union leaders, and many more - to build an agenda for upgrading international cooperation in the twenty-first century.

The Igarapé Institute also generated some wins on the scholarly front in 2021. For example, a new volume written by the Institute’s head of innovation, Robert Muggah, and Professor Ian Goldin from the University of Oxford was translated into eight languages. “Terra Incognita: 100 Maps to Survive the Next 100 Years (Penguin/Random House) drew praise from The Lancet magazine and was recommended by columnists from Foreign Policy to the Financial Times. Robert Muggah also contributed to the 2021 edition of the World Economic Forum’s Global Risks Report and wrote an article for Science, a leading academic journal. He was ranked among the top 1% of political scientists and legal experts in the world by Research.com.

No list of advocates for democracy in Latin America will be complete without Ilona Szabó from the Igarapé Institute. She has endured terrible attacks, yet she has remained unwavering in her fight to protect civic space. She even authored a book about it.

Felipe Estefan, vice president at the Luminate Group
Public Security
Regulating firearms and ammunition

In 2018 the incoming government promised to loosen firearm regulation and ramp-up access to rifles and pistols. After a blitzkrieg of decrees and new legislation it has succeeded. The registration of new firearms in Brazil tripled under the current government. Civilian gun licenses shot past one million. More than ever, Brazil needs an informed and public debate on the responsible ownership and control of firearms and ammunition. The Institute contributed to a series of articles and editorials on the issue in 2021 through a partnership with O Globo.

When the Brazilian government issued new decrees facilitating access to firearms and ammunition, the Institute contributed to hundreds of news describing the risks including El País, Folha de S. Paulo, O Globo, The Independent, TV Globo and The Guardian. The Igarapé Institute also mobilized citizens to pressure the Federal Supreme Court. High court Justice Minister Rosa Weber cited the Institute’s research when she issued her preliminary decision on the subject.

The Igarapé Institute and its partner, Sou da Paz, issued a technical note that generated debate about the risks of Bill No. 3.723/2019 which intended to expand access to firearms for hunters, shooters and collectors. The bill is pending with the Commission of Constitution, Justice and Citizenship of the Senate. Igarapé Institute took a leading role in mobilizing legislators and providing technical support to foment discussion on the Bill which could increase the number of arms holders by as as 500,000 people.

Research findings published by the Institute were featured in Descontrole no Alvo bulletins and highlighted in a technical note helping shape public debate on the issue. Analysis was cited in multiple news reports, including takeout in the O Globo newspaper. Surveys pointed to a 780% increase in the average daily registration of firearms by individuals with the Federal Police between 2017 and 2020, and the granting of more than 800 daily registrations for hunters, shooters, and collectors in the first months of 2021. The same research revealed that the armed forces inspected only 2.3% of private arsenals in 2020.

The Institute also took the debate to Congress. its work was cited by a number of lawmakers, including senator Eliziane Gama (CITIZENSHIP-MA), who founded the Parliamentary Front for Control of Arms and Ammunition. Folha de Sào Paulo cited the Institute in a lead editorial.
Drug policy reform

Igarapé Institute continued actively advocating for progressive drug policy reform at the national and global levels throughout 2021. During interviews with CNN, the institute’s president and co-founder Ilona Szabó underlined the close link between racism and the drug issues in Brazil. Citing the Institute’s Drug Policy Monitor in the Americas, Igarapé Institute researcher Carolina Taboada spoke to O Globo about the latest findings from Brazil and the wider Latin American region. Taboada highlighted how modest advances in drug policies in Brazil leave the country lagging compared to other nations in the western hemisphere.

Highlighted in a special report by Brazilian news outlets Fantástico and Folha, the agenda inspired Senator Randolfe Rodrigues to propose a bill for police valorization. In a separate but related development, in May 2021, an ill-considered police operation in the poor Rio de Janeiro neighborhood of Jacarezinho, one of the deadliest on record, prompted Igarapé to issue a technical note qualifying police tactics. Igarapé Institute’s innovation director Robert Muggah highlighted the incident in an article and also published empirical evidence of the effects of “community policing” for Science. The latter article cited research interrogating the claim that community policing necessarily builds citizen trust or reduces crime in the Global South.

Strengthening accountable law enforcement

The Igarapé Institute focused intensively on law enforcement, launching an agenda for valuing police professionals in partnership with Republica.org. The agenda expanded the discussion of approaches to build positive police capacity among public security institutions. A key objective is to value and protect officers and society. The Institute’s guidance outlines concrete strategies for implementing the agenda.

The agenda expanded the discussion of approaches to build positive police capacity among public security institutions. A key objective is to value and protect officers and society. The Institute’s guidance outlines concrete strategies for implementing the agenda.
Working with ex-prisioners

The Igarapé Institute and Brazil’s National Council of Justice forged a partnership through the Fazendo Justiça [Making Justice] program to build national support networks for People Released from the Prison System (Raesp – Redes de Atenção às Pessoas Egressas do Sistema Prisional). The strategy seeks to strengthen the work of Social Offices, a policy promoted by Brazil’s National Council of Justice (CNJ) since 2016 that catalogs services for ex-prisoners and their families.

Igarapé Institute launched two publications on the subject — Networks for Support to the People Released from the Prison System – Mapping Key Players and their Demands and The Network for Support to People Released from the Prison System in Rio de Janeiro: History, Challenge and Lessons. Both studies continued the tradition of a pioneer strategy for returning prisoners to society, known in Portuguese as Raesp-RJ, which was founded in 2006 and remained the lone initiative of its kind in Brazil for almost fifteen years.

In November 2021, Igarapé Institute launched a cycle of workshops to strengthen support for individuals released from the prison system, starting with the kickoff session, “How to Select and Monitor your Organization’s Performance Indicators.” During a public hearing on the prison system before the national Supreme Court, Igarapé highlighted the need to support individuals released from prisons. The hearing was broadcast on the Federal Supreme Court’s YouTube channel, on TV Justiça and on Rádio Justiça. The event was covered by the Legal Counsel.

Violence prevention

Igarapé Institute joined the Pernambuco Cooperation, an initiative led by the northeastern state’s Department for Violence and Drug Prevention Policy, with the participation of the United Nations Human Settlements Programme, the United Nations Development Programme and the United Nations Office on Drugs and Crime (UNODC). This joint effort seeks to build knowledge and share innovative methodologies to strengthen social and situational violence prevention initiatives.

Internationally, the Institute continues to support the Halving Global Violence (HGV) Task Force in partnership with Pathfinders for Peaceful, Just and Inclusive Societies. In June, Robert Muggah and Ilona Szabó – who are members of the task force – attended a meeting at Wilton Park, one of the world’s most premier conference venues. They have also supported a range of major international events focusing on SDG16, with a focus on preventing and reducing violence around the world.
Reducing violence against women

Igarapé Institute updated its EVA platform – Evidence on Violence and Alternatives for women and girls – and helped foster public debate and extensive media coverage on women at risk in Brazil, Mexico and Colombia. EVA found that almost 4 in 10 victims of femicide are between the ages of 45 and 65. Almost two thirds of women in Colombia reported suffering psychological violence by their partner, whereas close to half of Mexican women have experienced violence in a current or previous relationship.

Brazilian coverage of Igarape Institute research was recorded in O Globo, UOL Universa and other outlets. The platform was featured in a special episode of the podcast Angu de Grilo as well as YouTube videos shared by Mexican senator Patricia Mercado and influencer Mayra Hernández. The platform update coincided with #DiaNaranja, which every 25th day of the month brings together people committed to taking action to raise awareness and prevent violence against women and girls.
Taking action at COP26

In a crucial year of climate negotiations, the Igarapé Institute conducted in-depth research on the relationships between security and climate change. The organization featured findings on climate security at COP26 in Glasgow, Scotland, participating in several events. During the conference, the Institute launched ten new stories on the EcoCrime platform and published “Green, Clean and Safe.” On the eve of COP26, the Institute’s head of innovation, Robert Muggah, participated at TED Countdown, an event to discuss solutions for the climate emergency.

The Brazilian portal O Estado de S. Paulo featured videos of Igarape Institute engagement at COP26. President Ilona Szabó also took the reins as guest host of popular Brazilian celebrity and influencer Luciano Huck’s Instagram account, sharing highlights of the event with his 20 million followers and generating additional coverage by Folha de S.Paulo. Huck’s column on COP26, also published in Folha, was widely shared by the media and on Twitter, where he has more than 13 million followers. Prior to the event, the Igarapé Institute’s head of innovation Robert Muggah participated in a call with Glasgow Mayor Susan Aitken on how cities can accelerate green finance.

Mapping with EcoCrime

Launched on Earth Day in April, the Ecocrime platform generated wide repercussions throughout the year. The page, featuring several stories, data points, and maps drew coverage in media outlets such as Mongabay (where an interview with Robert Muggah became that website’s eighth most read article), Estadão, and Climainfo, as well as ample mention on social media channels. Well known public figures such as global TED curator Bruno Giussani, The Guardian environmental journalist Jonathan Watts, and GloboNews anchor Marcelo Lins cited the launch. The platform was also selected to represent the Igarapé Institute in the 2021 Paris Peace Forum, featured in a video.
Climate emergency

The Igarapé Institute also collaborated with relevant partners articulating responses to the climate emergency. In April, for example, O Estado de S. Paulo newspaper ran an article featuring the Brazilian Climate, Forests and Agriculture Coalition that assembled more than 280 representatives from agribusiness, social organizations, the financial sector, and academia, including the Institute. The document called for more ambitious targets and commitments to tackle climate change. In July, the institute also submitted a letter along with 55 other organizations to the Federal Attorney General’s Office and the Superior Council of the Federal Prosecution Office emphasizing the need to strengthen the Federal Prosecution Office’s role in the fight against environmental crimes and degradation in the Amazon.

Igarapé Institute also struck a technical cooperation agreement with the Federal Prosecution Office. At the request of the EL PAcCTO (Europe/Latin America – Assistance Program against Transnational Organized Crime) program, the Institute also supported a study showing the harm environmental criminals pose to indigenous communities, as well as the relatively little attention such crimes against native peoples generate in the media and public policy debates.

What is more, the Institute partnered with Interpol to publish a widely shared “Guide to Combating Environmental Crimes: Takeaways from the Fight Against Illegal Gold Mining in the Amazon.” The report features practical guidelines for authorities to disrupt wildcat mining. In addition, the Institute published a study together with InsightCrime laying out the roots of environmental crimes in the Colombian Amazon which was influential in European capitals. A related study on illegal gold mining and accompanying video also generated coverage in O Estado de S.Paulo, Época Negocios, R7, UOL, IstoÉ Dinheiro.
Shaping debate

In April, Ilona Szabó joined ambassadors from the United States, Germany, Norway, the United Kingdom, and the European Union to discuss communications initiatives for the Climate Summit and Earth Day. Szabó chaired the Scientific Panel for the Amazon in July disclosing the findings of a report prepared by more than 200 leading scientists from Amazon Basin countries.

Her article “How to Achieve Zero Deforestation in the Amazon in 2030” was published in English by Project Syndicate and translated into Portuguese by Folha de S.Paulo. It was also shared by both media outlets, TV host Luciano Huck, the World Economic Forum, and Young Global Leaders. The head of Innovation at Igarapé Robert Muggah, Juan Carlos Castilla-Rubio, and Julia Sekula also contributed to the article. Likewise, June, Muggah spoke at the TEDx Talks SP on the urgency of protecting the Amazon Basin. His lecture was widely shared on TED channels.
Climate security risks in Africa

The Igarapé Institute also deepened its analysis of how countries with the lowest GHG emissions are also the most vulnerable to climate change and climate-driven insecurity. In February, the institute launched a series of posts and data visualization features highlighting how rising sea levels, disruptions to water supplies, and changes in mobility drive competition for resources in West Africa. At a high level event organized by Igarapé Institute, Switzerland, Germany and Niger on behalf of the United Nations Security Council, convened more than 130 ambassadors at the UN headquarters in New York. Robert Muggah also took on the issue in a piece for Foreign Policy and in briefings for the International Committee of the Red Cross.
Fostering collective action on cybersecurity

Ensuring security of data, information systems, networks, processes, digital infrastructures, and people has become a paramount challenge in an increasingly connected society. Unsurprisingly, many nations including Brazil face steep challenges and threats in this space. Despite the creation of oversight institutions, laws, and regulations governing the subject, further progress is required especially to strengthen cooperation between civil society, the academic community, public authorities, and the private sector.

To this end, Igarapé Institute set out to systematize data and information on 104 initiatives, 78 documents, and 10 sectors through its Brazilian Cybersecurity Portal, launched in April. The data repository was created to foster collaboration among the various players in the sector dedicated to digital safety. Along with the portal, the institute released several groundbreaking studies on the subject, including: “Cybersecurity in Brazil – An Analysis of the National Strategy,” and “Digital Risk Mapping – A Multi-Stakeholder Action for Digital Security in Brazil.”

An article in Estado de S. Paulo and the portal Meio explored these findings. The United Nations Institute for Disarmament Research (UNIDIR) also shared the content on its website. The Brazilian Portal of Cybersecurity points to the required advances in the cooperation between civil society, the academic community, public authorities, and the private sector. It also presents a timeline of Cybersecurity and Digital Security events that took place in recent decades.
Privacy protection

The Igarapé Institute, Transparency International, Conectas Direitos Humanos, the Sou da Paz Institute and Rede Liberdade contributed decisively to the decision by the Federal Court of Auditors to suspend the government’s purchase of Pegasus software, on grounds that this surveillance tool posed significant risks to individual rights. The bid, totalling more than BRL 25 million, had been secretly set up by the Ministry of Justice and Public Security. Pegasus was supposed to be used to monitor and report on citizen activity on social media and messaging apps. An article by Igarapé researchers in El País warned about the risks that Pegasus posed to democracy and the rule of law.

Public debate and pressure from organizations led the NSO Group – the company responsible for Pegasus – to withdraw from the bidding. Our review of the issue found that 180 journalists and activists, and 16 world leaders had allegedly been targets of the technology. Igarapé’s work was disclosed by Transparency International Brazil. Deputy Bohn Gass (PT/RS) and Senator Veneziano Vital do Rêgo (MDB/PB) filed requests for information with the Ministry of Justice and the Brazilian Federal Court of Auditors. Meanwhile, together with other civil society organizations, Igarapé Institute signed a statement opposing the new privacy policy of WhatsApp, a company owned by Meta, which also owns Facebook. The document also asks the company to allow users to opt out of the new privacy policy without losing access.

Artificial intelligence

In addition to exploring new facets of artificial intelligence for The World Economic Forum, Igarapé Institute’s head of Innovation Robert Muggah contributed to a report on deploying AI after the restrictions of the coronavirus pandemic. The study was conducted by the UK Embassy in Mexico City and C.Minds. He also assessed the risks of AI-enabled surveillance in cities with a widely read article in Foreign Policy.
Civic Space

Countrywide mobilization

Democracy is under attack in Brazil and many other countries around the world. The Igarapé Institute has responded by calling for increasing protection of civic space. Strategies were compiled in a report entitled “The Civic Space is our Space”, launched in September on Democracy Day, alongside a national campaign that organically reached 270,000 people in the first ten days. Igarapé Institute mobilized 40 civil society organizations and 45 influencers in defence of Brazilian democracy The campaign included a tweetathon and mobilization via Instagram.

Artists, celebrities and well-known public figures such as Fabio Porchat (comedian), Ingrid Silva (dancer), Gabriela Prioli (host), Marina Silva (former Minister of the Environment), Raull Santiago (activist and entrepreneur), Vera Magalhães (journalist), Henrique Vieira (pastor), Nil Moretto (communicator) and Thiago Amparo (lawyer) joined the campaign. The initiative also showcased a video airing a number of individual testimonials asserting that any attack to the civic space is ultimately an attack on each one of us. The video and teaser logged 24,000 views on Instituto Igarapé’s channels alone. Folha de S. Paulo and O Globo also cited the initiative.
Igarapé Institute also called out the indiscriminate use of the Brazilian National Security Law through its Civic Space GPS. The institute filed as amicus curiae in the Supreme Court hearing on the matter, known as constitutional question ADPF 799, and joined the Pacto pela Democracia in signing an open letter calling for a new law compatible with democracy. JOTA.info and El País covered the initiative.

On the front line of democracy

The president and co-founder of the Igarapé Institute Ilona Szabó was interviewed on the Roda Viva TV show to talk about her work “A Defesa do Espaço Cívico” [Defending Civic Space], her recent book published by Editora Objetiva. In May, Companhia das Letras, a publishing house, added the book to the list of recommended reading on Brazilian politics. Szabó joined more than 500 economists, bankers, former federal government ministers, and public figures in signing an open letter on the threat to civic space, “The Country Demands Respect,” addressed to the federal government. The Institute and 40 other organizations also launched the “Democracy at the Tables,” an agenda of proposals for the Brazilian Congress. El País Brasil headlined the campaign in an op-ed piece.

Alongside 200 other civil society organizations, Igarapé Institute signed the “We Need Help” manifesto published by Folha de S.Paulo which called for greater social engagement in the public debate. The Institute made a point of reiterating its confidence in the country’s electoral justice and electronic voting system in another public manifesto. Igarapé Institute also joined public security and human rights organizations in signing an open letter in defense of democracy.
Elevating women’s voice

In the second season of Você Pode Mudar o Mundo [You Can Change the World], a podcast by the Igarapé Institute in partnership with Rádio Novelo, Ilona Szabó spoke with 10 female leaders about the vital importance of democracy and diversity in different fields of activity. Her guests included prominent Brazilian retail entrepreneur Luiza Trajano, federal deputy Tabata Amaral, microbiologist Natalia Pasternak and activist Alessandra Korap. Former environment minister Marina Silva and host Gabriela Prioli helped spread the word on their social media channels.

Ensuring clean elections

Within the electoral sphere, Igarapé Institute attended the opening of the Cycle of Democratic Transparency of the 2022 Elections at the Superior Electoral Court, at the invitation of its president, Minister Luís Roberto Barroso. The event was broadcast on the Electoral Justice’s YouTube channel. The Court also invited the organization to participate in the Election Transparency Observatory and to cooperate to strengthen the fight against fake news and disinformation within the context of the 2022 elections.
International Cooperation

Public consultation to accelerate global cooperations

In support of the United Nations Secretary General’s office, the Igarapé Institute coordinated a global digital consultation to identify solutions to emerging problems and challenges for Our Common Agenda. The consultation was facilitated in conjunction with partner organizations such as UN Foundation, and also included non-governmental groups such as ACCORD and Southern Voice.

The survey generated more than 520 proposals from over 1,700 participants in 147 countries. The findings were featured in the UN flagship report *Our Common Agenda*. Igarapé Institute also featured opeds in *Foreign Policy*, *DEVEX* and the *SDG Knowledge Hub* describing the importance of networked multilateralism.

UN Secretary-General António Guterres cited the Institute’s role in helping create the agenda at the opening of the 76th Session of the UN General Assembly. Igarapé Institute was the only organization outside the UN system featured on the organization’s website. Secretary General Guterres went further in a letter to Igarapé principals Ilona Szabó and Robert Muggah, commending the Institute as a “key partner in this endeavor.”
In this context of a pandemic, deaths, (shortage of) vaccines, and political polarization, coming across the “You Can Change the World” podcast was a breath of fresh air! Suddenly I was listening to people talk about solutions instead of problems, encouraging others to dream of and implement projects for the outcasts. I wish you much success in all your endeavors!!!

Simone Santana Santos, civil servant of the Federal Justice System in Campinas, São Paulo – Brazil
Boards and Contributions

- Members of the Igarapé Institute are regularly invited to join international and national networks. In 2021, our directors and researchers were invited to join the boards of several organizations, think tanks and universities. They also remained a presence in relevant spaces in which they already worked. Below is a list of some of the boards the Institute collaborated with in 2021:

- Amassuru - Red Latinoamericana de Mujeres en Seguridad y Defensa
- Board of Instituto Mobilidade e Desenvolvimento Social (Institute for Social Development and Mobility)
- Board of Trustees of CEBRI - Brazilian Center for International Relations
- Young Global Leaders Advisory Board
- Conselho Consultivo do Relatório de Desenvolvimento Humano do Programa das Nações
- Gender Equality Network for Small Arms Control (GENSAC)
- EU Cyber Direct
- Forum on the Arms Trade
- Offensive Cyber Working Group
- Halving Global Violence (HGV) Task Force, do grupo Pathfinders for Peaceful, Just and Inclusive Societies
- United Nations Development Programme (UNDP)
- World Economic Forum - Advisor to the Global Risk Report
- World Economic Forum - Global Future Council – Cities and Urbanization
- TED Red Circle
- RESOLVE Network
- Romeo Dallaire Institute
Awards

Instituto Igarapé was nominated twice for the Faz Diferença Award, held by Jornal O Globo and Firjan.

Instituto Igarapé was listed for the second time as one of the 100 Best Brazilian NGOs of 2021 by Instituto Doar.

Instituto Igarapé was recognized as one of the Top Think Tanks in South and Central America by the Think Tanks and Civil Society Program (TTCSP) of the University of Pennsylvania in the 2020 edition of the Global Go To Think Tank Index.

Prospect Magazine ranked Igarapé among the of global think tanks in the climate and energy sector.

Researcher Louise Marie Hurel was nominated for the “Embaixador e Protagonista Brasil, País Digital” [Ambassador Brazil, Digital Country and Leading Figure Brazil, Digital Country] award, which recognizes leaders from the public and private sectors and civil society who have stood out for their work in social projects and actions in the area of information technology with a focus on the country's digital and inclusive transformation.
Congratulations to Robert Muggah and Ilona Szabó de Carvalho for the incredible work that Instituto Igarapé has accomplished in the last ten years. I am honored to have witnessed the Institute’s actions in the UK, Brazil and at TED conferences.

Caroline MacDonald, Director of Development at the American School of Paris, France
Igarapé Institute produced a series of strategic articles and academic publications in 2021.

The Institute attracted considerable online attention:

**217,000 views**
on the institutional website - a 15% increase over 2020.

**8,8 million people**
reached on organizational social media channels.
An amazing job, indeed! Ilona and Robert are very inspiring people and have put together a talented team to support the vital work they do at Igarapé!

Rodrigo V Cunha, CEO and founder of Humanos de Negócios
The Igarapé Institute is an independent think and do tank focused on the areas of public, climate and digital security and its consequences for democracy. Its objective is to propose solutions and partnerships for global challenges through research, new technologies, communication and influence on public policies.

The Institute works with governments, the private sector and civil society to design data-based solutions. We were awarded the best Human Rights NGO in 2018 and the best think tank on social policy by Prospect Magazine in 2019.

We are a non-profit, independent and non-partisan institution, headquartered in Rio de Janeiro. Our operation, however, transcends local, national and regional boundaries. The Igarapé Institute has professionals in cities in all regions of Brazil and in Canada, Colombia, the United States and the United Kingdom. We have partnerships and projects in over 20 countries.
